

Homework drawing assignment

For this assignment you must make a simple, graphic drawing of objects from the kitchen cupboard, garage, clothes cupboard, bathroom, etc.

You can choose three objects that in real life are really different sizes. But when you draw them, draw them all about the same size and overlapping each other like in the example below.

Make your drawing on an A4 sheet, using pencil to start with, not pressing too hard, and then work over the top using a fine liner or black felt-tipped pen (stift).

The end result should be a sharp and graphic style of drawing.
