

MIXING AND NAMING COLOURS ASSIGNMENT

We have looked at the Primary and Secondary colours during our lessons. These colours are kind of the basic colours. We have pots of paints with these sorts of colours.

However, there are lots of other colours of course. We have to get these colours by mixing them. Sometimes by putting just two colours together, sometimes many more.

- Draw ten boxes on a piece of A4 paper. The boxes must be about 3 cm x 3 cm.
- Use the pots of paint in your drawing box to mix ten different colours.
- EVERY COLOUR MUST BE A MIXTURE OF AT LEAST TWO OTHER COLOURS
- Paint each of the boxes a different colour.
- You must then give each of the ten colours a different name. Make sure that the names suit the colour and that they are interesting names. (Grass green or sky blue are way too boring!)

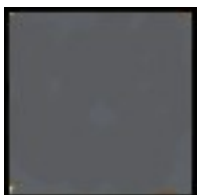

Below are a few examples to give you ideas for the sorts of names that you might use. Remember, make them interesting!!

Golf course green

Bedroom carpet yellow

*Thunder storm
grey*

Goal mouth brown
